SSTX Silver Star Stainless Steel Flat Head Star Drive Wood Screws 1-1/4" to 4" lengths

Star Drive Recess

- Reduces camout and end load
- Twice the torque of Phillips or square drive
- Eliminates spinning and fastener damage
- Two recess sizes (20 & 25) to match the torque requirements of the screw size
- Gives better bit life

Type 17 Notched Extra Sharp Point

- Starts quickly without 'walking'
- Significantly reduces spitting & drive torque requirements by removing wood from the hole as the screw penetrates instead of forcing the wood apart

- **Waxed & Lubricated**
- For easier driving

Knurled Shoulder

- Reams hole in board being fastened, reducing drag on shank and driving tool

True Flat Head with 5 Cutting Nibs

- Self-countersinking
- Prevents spin-out

The Ultimate Corrosion Resistant Screws!

SSTH Silver Star Stainless Steel Trim Head Star Drive Wood Screws #9 x 1-5/8" to 4" lengths

T-20 Drive Size

- For proper torque

Type 17 Point

- Drives easily
- Reduces splitting

Sharp Threads and Proper Thread Angle

- Cut cleanly without crumbling or crushing, reducing splitting and cracking
- Ideal for end grain use

Waxed & Lubricated

- For easier driving

Knurled Shoulder

- Reams hole in board being fastened, reducing drag on shank and driving tool

Small Head with Cutting Nibs

- Self-countersinking
- Gives a professional-looking appearance

AC257 Approved!

FREE BITS Included!

Grade 305 Stainless Steel

- Highest nickel content of the 18-8 stainless steels.
- Delivers superior corrosion resistance
- Eliminates discoloration and staining around screw heads
- Unaffected by tannic acid and other extractives found in cedar and redwood

305 stainless steel can be used with all chemically treated materials, plywood applications and all fastening applications which are exposed to weather, high moisture, and other caustic conditions such as coastal areas. Manufactured from the finest stainless steel alloys. Highest nickel content of the 18-8 stainless steels, delivers superior corrosion resistance, eliminates discoloration and staining around screw heads and is unaffected by tannic acid and other extractives found in cedar and redwood.
